Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 2-5,6,9-11,12,13,14-15, 17-24,26-29,32-38,41-42 and 44-45 are drawn to estimating a cost classified in class 705 subclass 37.
 - II. Claim 7 is drawn to charging a customer for services, classified in class 705 subclass 34.

The inventions are distinct, each from the other because of the following reasons:

Inventions I , II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed such as a charging a customer for a service. The subcombinations have separate utility such receiving payment.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
